

- Founded in 1981 with headquarters in our state-of-the-art ISO Certified corporate office in Bolingbrook, IL.
- Offering a wide variety of products including fuel injection pumps, injectors, turbochargers, additives, and more.
- With over 65 Factory Trained Technicians and a total of 1,100 combined years of industry experience and 90 test benches the Seidel Diesel Group is the leader in diesel remanufacturing, reverse engineering and vehicle services.

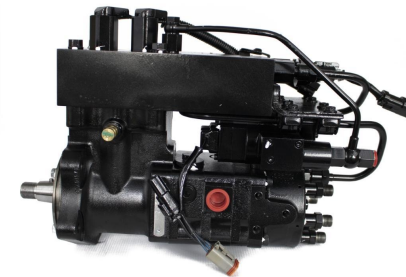

Our Remanufacturing Processes

TEARDOWN & CLEAN

- CP4 & CP3 Common Rail Pu
- Common Rail Injectors
- VP44 & VP30 Pumps
- DS Pumps
- CAPS Pumps
- And More

REBUILD

TEST & CALIBRATE

Environmental Impact

Taking into account the remanufacturing operations of just 5 of our product lines including VP44s, DS/DB2s, CP3s, Crins, and CAPS saves nearly *81,000lbs. of aluminum* and *182,000lbs. of steel* from ending up in landfills.

Environmental Impact

The amount of aluminum and steel we save equates to *508,985,710 kWh* of energy saved. That's enough energy to power nearly *50,000 homes* in the US *for one year*, enough to power all of the homes in Savannah, GA.

Thank You!
